## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 8, and 20** are rejected under 35 U.S.C. 102(b) as being anticipated by Abbott, et al. The referenced patent discloses a cassette comprising a first valve means and second valve means in line with the valving chamber and the patient, wherein the first valving means, while sealed closed preventing fluid communication from the source, is adapted to urge a charge of pressurized fluid downstream from the valving chamber while the second valving means restricts flow to the patient.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3763

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. **Claims 2-7, 9-19, and 21** are rejected under 35 U.S.C. 103(a) as being unpatentable over Abbot, et al. and/or Pastrone, et al. The purpose of this rejection is to provide evidence to demonstrate that the limitations set forth in the above rejected claims are such that a person of ordinary skill in the art, at the time the invention was made, would have considered said limitations as obvious design alternatives in view of the conventionality of the claimed enhancements. If there is disagreement with this rejection, examiner respectfully invites applicant to provide arguments to support the patentability of any of the above rejected claims.
